

NEW-100% FIELD-PROGRAMMABLE LED DRIVERS
tapTronic™ Drivers

Introducing a family of 100% field-programmable LEDVANCE tapTronic™ NFC LED Drivers. Near Field Communication converts your smartphone to your personal programming tool making it easy to program the drivers from anywhere, at any time. Power to the driver is not required during programming. Designed to have a larger programming range, reading and programming our drivers is just a tap away!
